

Herbicide Activator/Nonionic Surfactant

AP Burner is a proprietary blend of superior non ionic surfactants and herbicide activators. **AP Burner** will not only maintain certain pesticides, such as glyphosate, in their most active form but it also improves droplet coverage and canopy penetration while slowing droplet drying, all of which combine to increase the kill speed and effectiveness of your burndown application.

Rate 1-2qt/100

Features and benefits

unsurpassed droplet coverage and canopy penetration.

Quicker burndown activity during cooler temperatures

Better control of hard to control weeds

Improved coverage of herbicides like gramoxone

Burndown only
